

SharePoint Deployment Planning Services

Roadmap for transforming your content management, collaboration, and search strategy

You have already paid for this Software Assurance benefit—use it to plan your Microsoft Office SharePoint Server 2007 deployment.

Experience the benefits this service offering delivers:

- More value from your Software Assurance investment.
- The latest best practices and deployment tools from Microsoft Services.
- A customized deployment roadmap that can help you reduce deployment time and cost.

Microsoft® Office SharePoint® Server 2007 is an integrated suite of server capabilities that can help improve organizational effectiveness by providing comprehensive content management and enterprise search, accelerating shared business processes, and facilitating information-sharing across boundaries for better business insight.

Many organizations have licenses for Office SharePoint Server 2007 as part of their Enterprise Agreement but have not deployed it or are not experiencing the maximum value of its powerful features. This service offering delivers a valuable benefit that you have already paid for to help you get the most value from your Enterprise Agreement and Software Assurance investment.

Expert and Personalized Service from Highly Experienced Microsoft Services Consultants

Microsoft Services SharePoint Deployment Planning Services is a service offering that provides you with a well-integrated deployment plan that can help lower costs and optimize your business productivity infrastructure. In addition to being useful for assessing and controlling the overall deployment cost, this service offering can help you plan a more secure and well-managed collaborative infrastructure that supports several key capabilities of Office SharePoint Server 2007:

- Portals and collaboration
- Web and enterprise content management
- Enterprise search

Microsoft Services consultants, highly experienced in deploying Office SharePoint Server 2007 solutions, will provide expert and personalized service while working with your IT staff to develop a deployment plan customized for your specific environment.
